

DCMR CSK - DCMR CPS

Regrouped Manual Controls Device (DCMR)

SPECIFIED USAGE

The Regrouped Manual Control Devices (DCMR) allow the regrouping in a single place (main access) of all the smoke and heat control initiation controls covering several areas (4 areas max) in the same room/space.

DCMRs CSK are equipped with a local manual control only.

DCMRs CPS are equipped with a local manual control but can also be equipped with a remote control.

DCMRs CSK and DCMRs CPS are of "opening only" type. They comply with regulation requirements and have been granted the Certificate of conformity (NF S 61-938 standard) and NF Right of Use (license).

CERTIFIED PRODUCT

OPERATION

The "percussion lever" is manually activated after sliding down the "retractable shutter" (or breaking the glass panel according to the selected model). DCMR CPS is activated with a remote control.

DESCRIPTION

All the models can receive 100 grams max CO₂ bottles and can be supplied in "removable shutter" or "breakable glass panel" versions.

Possibility of remote control by "electric module" on the DCMR CPS product range.

For more specific information, refer to the catalog data sheets "CSK" or "CSP(opening only model)".

- Epoxy-coated metal box.

- Copper tubes output in upper, lower, lateral part, or toward the bracket (according to the selected model).
- Detailed technical data sheet supplied.

VISUAL INDICATION OF A PERCUTED BOTTLE

The disappearing of retractable shutter, the broken glass panel and the lever sticking out from the box are indications of the container percussion.

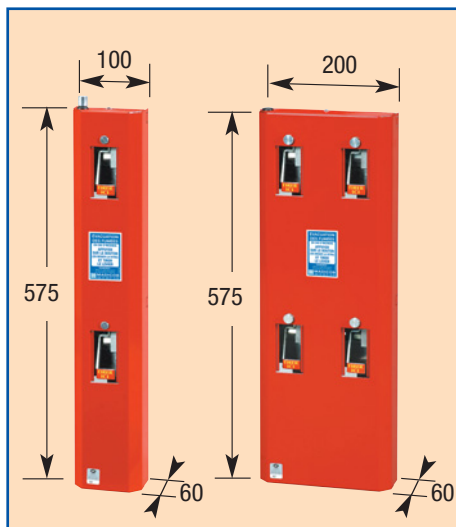

RESETTING

Instructions related to the control panel resetting are written inside the cover front.
